*CB9 2016 Welcome Reception
Le Musée des Arts et Métiers
August 29, 2016 at 6 pm*

Le Musée des Arts et Métiers

This is your chance to follow in the footsteps of inventors and pioneers of progress and explore a one-of-a-kind repository of scientific and technical knowledge...

Founded in 1794 by Henri Grégoire, the Conservatoire national des arts et métiers, "a store of new and useful inventions," is a museum of technological innovation. The Musée des arts et métiers was refurbished in 2000, and now exhibits over 2,400 inventions. They are split into seven collections Scientific instruments, Materials, Energy, Mechanics, Construction, Communication and Transport.

La Salle de l'Echo

Between two witnesses of transport history, the dray of Nicolas-Joseph Cugnot (considered as the first automobile) and the plane 3 of Clement Ader, suspended above the grand staircase of the museum, La Salle Echo offers a reception area that is both warm and original.
